

Shaping the Future of AI Through Global Academic Excellence

Nor Liyana Mohd Shuib, Dept. IS FCSIT, UM
Noor Yusrina Hashim, FCSIT UM

Highlighting the 2026 Asian University Alliance (AUA) -UM Postgraduate Academic Forum was successfully hosted between 17-18 April 2026. Hosted by the Faculty of Computer Science and Information Technology (FCSIT), Universiti Malaya (UM), spotlighting the university's enduring commitment to advancing global academic collaboration and AI innovation.

Over two days, the forum brought together groups of the faculty's member of academics, researchers, the postgraduate students, and industry experts

It provided a platform for sharing ideas, discussing current challenges, and exploring new frontiers in AI and data science, reinforcing the importance of regional academic cooperation.

The forum brought together distinguished speakers whose sessions blended academic insight with real-world industry perspectives. Together, they underscored the popularly rising significance of artificial intelligence and data-driven innovation in shaping the future.

AI-Powered Insights: The New Era of Data-Driven Intelligence

It welcomed 100 participants from AUA member universities, including United Arab Emirates University, Universitas Indonesia, University of Tokyo, Chulalongkorn University, Seoul National University, National University of Singapore, and Universiti Malaya. This diverse and significant international presence highlights and paved the increasing importance of regional collaboration in context of advancing research, innovation, and the exchange of knowledge.
